EDOGAWA GOSEI (THAILAND) CO., LTD.

**EDOGAWA GOSEI (THAILAND)
has released its own website**

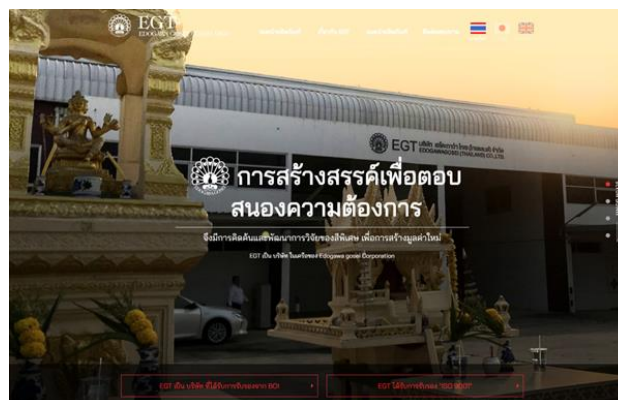

EDOGAWA GOSEI (THAILAND) CO., LTD. ("EGT") has recently built and released its own website.

EGT, a local subsidiary established in Thailand in 2013 as a production base in Southeast Asia for the EDOGAWA GOSEI Group, is a wholly-owned subsidiary of EDOGAWA GOSEI CO., LTD.

In keeping with the growing trend of businesses expanding internationally, with the aim to market our proud "Japan quality" products around the world, EGT locally produces products that are of equal quality as the products developed in Japan. This website supports Thai, Japanese and English languages in order to respond to the expectations of all customers with a manufacturing base in Southeast Asia, including Thailand.

In addition to two main products, "EMI 51ac" that provides excellent electrical conductivity and shielding properties, and a primer "Epolite" that provides outstanding cutting oil resistance, EGT plans to produce "Zabon Enamel" of which needs are rapidly increasing not only in Japan but also in Thailand.

EGT will expand its production lineup and update its web information as well.
